

Facts for Weak Women

Nine-tenths of all the sickness of women is due to some derangement or disease of the organs distinctly feminine. Such sickness can be cured—is cured every day by

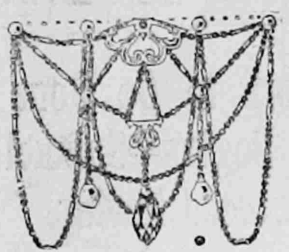

Dr. Pierce's Favorite Prescription

It Makes Weak Women Strong,
Sick Women Well.

It acts directly on the organs affected and is at the same time a general restorative tonic for the whole system. It cures female complaint right in the privacy of home. It makes unnecessary the disagreeable questioning, examinations and local treatment so universally insisted upon by doctors, and so abhorrent to every modest woman.

We shall not particularize here as to the symptoms of those peculiar affections incident to women, but those of positive cure are referred to the People's Common Sense Medical Adviser—1008 pages, newly revised and up-to-date Edition, sent free on receipt of 21 one-cent stamps to cover cost of mailing only; or, in cloth binding for 51 stamps.

Address Dr. R. V. Pierce, Buffalo, N. Y.

JEWELRY marks the woman or the man. Dainty jewelry—a dainty person. Have you studied jewelry lore? We have—the commercial part—and mastered it. Best the world produces—yes, the best. Gold exquisitely wrought—silver in manifold forms—precious stones—everything that a first-class jewelry store carries that seeks the finest trade.

SALT LAKE AND STATE NEWS

INSPECTOR CONTINUES PURE MILK CRUSADE

Salt Lake, Aug. 11.—Inspection of the Jersey dairy of A. Lundberg yesterday is said to have disclosed the fact that Lundberg has been in the habit of buying part of his supply from other dairies and furnishing it to his customers without notifying them that it was not the product of the Jersey dairy.

It is the opinion of Dr. William Stephenson that milk bought from Lundberg's men caused the death of the infant son of Frank Torgensen, residing in the rear of 132 South Ninth East street.

The practice of getting milk elsewhere was condemned yesterday in harsh terms by City Food Inspector Frazier. Lundberg was unable to recall where he got the milk that he sold to the Torgensen family some ten days ago, a sample of which was pronounced by Dr. Stephenson as unfit for use.

Lundberg claims the milk was not from his own cows.

The inspector says the staples of the Jersey dairy are in only fair shape and in many places the city ordinance is not being observed.

It is the opinion of Mr. Frazier and of every physician in the city that it is time the public awoke to the fact that infant mortality is due largely to improper food supply and that milk is the main cause of the trouble.

"Every effort is being made by the city department," he said, "to enforce the regulations of the ordinance, but a large part of the campaign is up to the people themselves."

PROMPT AID IS GIVEN TO ILL AT HOSPITAL

Salt Lake, Aug. 10.—The emergency hospital on the sixth floor of the Boston building was one of the busiest places in Salt Lake City during and after the parade. A number of men, women and children taken to the hospital were given prompt attention by the large and efficient corps of physicians and nurses.

Many children who were prostrated by the heat were cared for in houses near the living flag, and were removed thence to their homes. No dangerous cases were reported, all being simple heat prostrations.

The following cases were registered at the emergency hospital in the Boston building:

Mrs. George Rhine, 75 North Second West.

Mrs. Cristy, 523 1-2 South Seventh East.

Miss Lizzie Cox, Union, Utah.

George Day, Fairbourne, Ill.

Mamie Irvine, 461 North First West.

Annie Carson, Fourth South and Fifth East.

Mr. Youngs, 54 Depot avenue.

Sergeant Simpson, Fifteenth Infantry.

Helen Griese, No. 8 Thornerdine Court.

Marie King, 334 East Second South.

Florence Miller, 609 South Eighth West.

Stella Brunsome, 1229 Johnson street, Poplar Grove.

Louise Armstrong, 33 South Fifth East.

Elizabeth Groesbeck.

Vilda Buis, 815 West Eighth South.

J. J. Hessler, 958 East Eleventh South.

Grace Davis, 172 K street.

Myrtle Dean, 1130 Buono street.

W. R. Leonard, 270 West South Temple.

Margaret Finch, 537 Sixth avenue.

Lella Holt, 234 Floral avenue.

Pearl Morton, Montrose avenue.

J. C. Ryan, Bath Me.

George W. Ficks, 80 D street.

Miss Hill, 9 Vincent court.

McCauley Wilburn, Twelfth East and Twelfth South.

Ellen Mieskind, 63 West Seventh South.

Christine McLaren, 50 Louise court.

Margaret Stahl, 842 South Tenth East.

Mildred Richins, 851 Washington street.

Bertha Musig, Mt. Pleasant.

Alma Anderson, 816 West Third North.

Blanche Perkes, 1122 Miller avenue.

Martin Geth, Northern Nevada (Al-
lentown, Pa.)

ST. MARY'S CHOR TO HOLD
ITS FINAL REHEARSAL

Dedication March, With 300 Boys and
Girls in Line, Will Be Practiced.

Salt Lake, Aug. 12.—The choir of St. Mary's cathedral will have final rehearsal on Friday, with J. J. McClellan at the organ. Twelve members of the Salt Lake symphony orchestra will play and Mrs. Edward McGurran will preside at the harp.

Miss Nora Gleason, director, 200 girls and 100 boys will meet Friday morning for final rehearsal of the dedication march, which will form at the old St. Mary's cathedral on Second East on Sunday at 8:30. The girls will wear white dresses, white veils and wreaths. They will march to the new cathedral singing Haydn's "Te Deum," and will enter the cathedral at the west door, remaining through the pontifical high mass.

LIGHTNING KILLS YOUNG GIRL
Deadly Bolt Descends From An Ap-
parently Cloudless Sky.

Ephraim, Aug. 11.—This morning about 10 o'clock Cora Cook, the 13-year-old daughter of Mr. and Mrs. Fred Cook of Marysville, was instantly killed by lightning.

She was accompanying her brother to the store when the bolt descended, striking her on the left side, tearing the shoe from her foot.

She was picked up lifeless by passersby.

The sky seemed perfectly clear just before the deadly bolt descended, but a terrific rainstorm followed shortly after.

ROB ROY OF BEAVER.

Assay returns show values of \$250 a ton in an average sample taken from

SUMMER COLDS

Are Considered by Doctors More Dan-
gerous Than Winter Colds.

In the first place, a person is quite apt to catch cold in the summer as in the winter. It is harder to cure a cold in summer than in winter. The bracing air of winter assists the remedy in overcoming the cold. The sultry, depressing and changeable weather of summer greatly retards and sometimes prevents the cure of colds in the summer. Probably more cases of chronic disease have resulted from summer colds than winter colds. The doctors are beginning to wake up to this fact, which has been largely overlooked by them in the past.

Miss Ivy Gray, Fairview, Ky., says: "I have taken Peruna, and would say that it is the best medicine for coughs and colds I ever saw. I find that it always cures a cold in a short while. It also strengthens and builds up the system."

Mr. Charles V. Daniels, 105 East Third Ave., Beloit, Kas., says: "I am very susceptible to colds. Peruna rid me of my trouble. I am well and strong now, and I shall certainly know what to take when I contract another cold."

George W. Anderson, care Fire Department, Galesburg, Ill., says: "I caught a bad cold. A druggist advised me to try Peruna, and I did. I soon forgot that I ever had a cold, and I shall always have Peruna on hand, for it certainly does the business."

A four-foot ledge cut by the new shaft in the Rob Roy mine, in Newton district, according to the Beaver Press. Free gold is visible in all of the samples brought down, it is said, some of the specimens apparently running as high as \$200 a ton.

The new shaft is down about 95 feet; it is well timbered and in shape for hard service. A whim, with steel cable, is being placed on the shaft, the installing of which will mean more rapid sinking.

Owners of neighboring properties are watching developments in the Rob Roy with keen interest, the strike there tending to increase activity all over the district.

NEW STRIKE NEAR BATTLE MOUNTAIN

Salt Lake, Aug. 11.—Near the top of Battle Mountain, ten miles south-west of the town of Battle Mountain, Nev., Nash and McDonald made a strike last week which caused a rush of claim locators to the district. Ore running from \$1,040 to \$1,379 a ton in gold and silver was taken from a contact vein between porphyry and quartzite.

The contact is traceable for a considerable distance, and Jesse W. Fox of this city, who was one of the early arrivals on the scene, said yesterday that for its entire length the contact had been covered by locations.

Only a shallow hole had been sunk at the point of discovery, Mr. Fox said, and no solid body of ore giving the values mentioned had been disclosed. But many pieces of the rich quartz were found in loose formation between the porphyry and quartzite and there was every evidence that a strong ledge would be opened at some what greater depth. Samples which had been assayed showed values of 50.66 ounces in gold and 54.64 ounces silver, and 66.64 ounces gold and 33.88 ounces silver to the ton.

The new strike is four miles north-west of Mr. Fox's Iron Canyon Gold Mining company's property, where conditions continue to be altogether satisfactory. While the lower tunnel has not yet cut the ledge ore of good grade is still being taken from the surface workings, another carload shipment carrying values close to \$70 a ton being now on the market. The tunnel is due to tap the vein at the depth of about 150 feet almost any day, and then the company should be in position to materially increase production.

PRINCE OF WALES.

Salt Lake City, Utah, Aug. 11.—Fred L. Schrott, the "Lucky Dutchman," has made good again—this time in the old Prince of Wales mine in Alta, which in the early days made several millions of dollars for the Walker brothers. But Schrott would probably contend that hard work more than luck has had to do with his present success. Something more than a year ago he was granted a lease on the old mine. Since that time he has been burrowing for ore, battling with snow, and saving nothing. Now he has the second largest producer in the Alta district, the terms of the lease have been extended three years; it has been made to cover two-thirds of the Prince of Wales ground and six adjoining claims have been taken over as the further basis.

Now he has the second largest producer in the Alta district, the terms of the lease have been extended three years; it has been made to cover two-thirds of the Prince of Wales ground and six adjoining claims have been taken over as the further basis.

BRIGHT'S DISEASE

That chronic Bright's Disease is now being cured by treatment that reduces inflammation in the kidneys is beginning to be generally known.

We copy the following from the San Francisco Bulletin, June 22d, 1908:

"The recovery is reported of Mr. Z. Lawton, of 264 Fifth Avenue, San Francisco. The case is especially interesting, due to the fact that books declare chronic Bright's Disease incurable and five city physicians had passed on and diagnosed the case. The usual symptoms found in extreme cases were reported—excessive dropsy, enlarged heart and towards the last the patient could only sleep sitting up, and for six weeks he slept in a chair. Lawton had a cousin, Mrs. W. E. Hoover of Auburn, who also had an advanced case of Bright's Disease. She had been tapped three times when she heard of Fulton's Renal Compound and made a fine recovery. This interested Lawton in the treatment and it resulted in his recovery also. He is a Mason, member of Excelsior Lodge, and many members will recollect his serious predicament and that they thought they would be called on to pass him over."

Parties desiring to know more of this treatment can get full literature by addressing the John J. Fulton Company, 5910 San Pablo Avenue, Oakland, Cal.

Fulton's Renal Compound can be had in your city or our agent.

WM. DRIVER & SON DRUG CO.

We desire every patient to write us who is not noting the usual improvement by the third week.

of the corporation—the Prince of Wales Mining company, whose capital stock was yesterday increased from 10,000 shares of the par value of \$1 a share to 200,000 shares, par value 25 cents a share.

In an incline shaft which runs under the old workings, Schrott has opened a shoot of chimney of ore six feet thick, all of shipping grade. A force of eleven men is at work in the incline shaft, and a large body of ore is being run down to the sampler. The mine is on a paying basis now and an extensive campaign of development and improvement has been entered, including a tunnel to explore both old and new ground at much greater depth than has yet been attained and the building of a mill to treat the second class ore, with tramway from mine to mill and loading station.

The mine is just over the hill from the old Black Bear mine of the Utah Coalition Mines company, and is near the City Rocks and Continental Alta properties. It was one of the famous producers of the early days of the camp, when only the surface ore deposits were "scratched." The present management is confident of making it one of the big producers of the future. Officers and directors of the Prince of Wales company are: Fred L. Schrott, president; E. A. Ulrey, secretary and treasurer; A. L. Elgren, A. J. Elgren and L. P. Hill.

RIVES MINE TO BE PROVEN AT DEPTH

Salt Lake, Aug. 10.—For years the old Siebert mine at Caliente was worked in haphazard fashion. Following the explosion in the tunnel of ninety-five boxes of dynamite, which, of course, completely wrecked and closed the workings, there was a long period of inactivity. About a year ago the Rives took hold of the property and have been conducting work along new lines. They have opened a body of rich gold ore four feet wide, all of which is said to carry milling values. The work now in hand is the exploring of that ore body to water level to determine definitely the kind and capacity of mill required to treat the ore.

An interesting feature was brought to light a few weeks ago when the old tunnel was tapped some distance back from the claved portion by a new tunnel. The discovery was then made that the old tunnel had been driven for 200 feet against the hanging wall of the vein, presumably without the operators having become aware that they were next to ore.

Judge W. D. Maynard of Caliente, who is in the city attending the encampment, declares that for the 200 feet the wall of the vein shows as smooth in the tunnel as the wall of a building, and that one can scratch the wall almost anywhere and bring free gold to view.

Judge Maynard owns ground adjoining the Rives mine, so that he is particularly interested in the work that is being done in the Rives, for the reason that it is proving his own property as well as the other. He has done enough prospecting on his own account, however, to bring to light what appears to be an important contact vein. He is confident that Caliente will soon be heard from as one of Nevada's best gold mining camps.

TUNNELING FOR ORE.

Reports from Wallace, Idaho, are that the Snowstorm Mining company, operating in that district, has found a plan to drive a tunnel through the 80-foot vein of soft rock, tale and mud, which has given the miners so much trouble in tunnel No. 4. The mud vein was struck in the drift some time ago, and accounts for the failure to tap the ore body in this tunnel. It was found to be impossible to continue the drift, which is yet from 200 to 250 feet from the ore body. Bulk heading and timbering were tried, but the enormous weight was too much for timbers. Steel rails will now be employed and it is believed that the problem has been solved. This part of the tunnel will be encased in steel rails for a distance of 10 feet. It was generally believed on account of the failure to strike ore in this tunnel, that the ore body did not extend that far down, but in reality the face of the tunnel is reported to be between 200 and 250 feet from where the ore body should be encountered.

The management of the Wonder Mining company, operating in the Coeur d'Alene district, reports striking ore a few days ago. The vein at the point of intersection is richly mineralized with lead carbonates, crystallized quartz and iron oxides. It is 12 to 15 feet wide and was cut at the exact point expected. Drifting on the vein has been started.

UTAH GOLD AND COPPER VEIN PROVES STRONG

Salt Lake, Aug. 11.—From a winze sunk ten feet on the first vein of the Utah Gold and Copper a carload of ore of shipping grade has been taken, is the report brought from the mine by F. L. Breckon, son of Manager J. C. Breckon, who arrived in the city yesterday. Further than that, he reports that the vein is improving in size and quality of ore as it is being opened either way. In the north drift, which has been extended 120 feet from the point where the tunnel intersected, the vein is a three-foot body of ore, the assays from which give values of \$2.6 per cent lead and 8.8 ounces silver. The south drift is in a body of milling ore from eight to ten feet wide.

Two shafts are employed driving the main tunnel ahead to cut at depth the four or five other veins in the hill, all of which have good ore showings, where they have been opened. Upon his return to the mine in a day or two Manager Breckon will start teams hauling ore to the railroad for shipment to the smelter.

TINTIC CENTRAL GETS WATER IN ITS SHAFT

At the depth of about 360 feet water has been encountered in the shaft in the Tintic Central Mining company's mine. The management expects to be able to handle the water without serious interference with sinking operations. Water is usually encountered in sinking through the Tintic porphyry, which overlies the lime, to be drained off after the more porous limestone is reached. While the appearance of the water may be taken as an indication that the limestone is not far away, there is no hard and fast rule for guidance in that respect. The water in some cases lies within a few feet of the limestone, while in other instances it has been anywhere from 50 to 150 feet above the zone sought for.

BABY'S VOICE

Is the joy of the household, for without it no happiness can be complete. Angels smile at and commend the thoughts and aspirations of the mother bending over the cradle.

The ordeal through which the expectant mother must pass is such that she looks forward with dread to the hour when she shall feel the thrill of motherhood. Every woman should know that the danger and pain of child-birth can be avoided by the use of Mother's Friend, which renders pliable all the parts, assisting nature in its work. By its aid thousands of women have passed this crisis in safety.

WORK IS ORDERED STOPPED
ON PROJECT IN YOSEMITE

San Francisco, Aug. 11.—In consequence of orders said to have been issued by Secretary Ballinger of the interior department, General Forsythe, in charge of troops in Yosemite valley, has prevented the erection on government land of temporary buildings to shelter the workmen sent out by Engineer Marsden Manson of this city to begin the Hetch Hetchy water project.

Under the agreement between the city and former Secretary James R. Garfield, the first improvements were to have been made at Lake Eleanor, and it was in pursuance of this plan that Manson sent his men into the region. General Forsythe notified the Secretary Ballinger of the activities of the San Francisco engineers, and the order to stop all work on the government's preserves follows.

A dam in the system, by which this city is to be supplied with water, was to have been built at Lake Eleanor and until permission is received from Ballinger to proceed along the lines agreed to by Garfield, no progress can be made.

City officials will endeavor to get the secretary of the interior to remove the obstacles when he arrives here from Spokane on his way back to Washington.

SUICIDE OF LIFE GARDNER AT SALEM

Salem, Utah County, Aug. 9.—The deliberate suicide of Life Gardner last week shocked the community as nothing else has in many years.

He has a farm in the suburbs and lately decided to build a hotel in town.
